PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science & Engineering student at Bennett University with a strong interest in Software Engineering, AI Engineering, and Full-Stack Development. Experienced in building AI-powered applications, web applications, and real-world digital solutions. Hands-on exposure to resume parsing, LLM-powered applications, prompt engineering, REST API integration, Agentic AI, AI agents, and multiple AI tools and platforms. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and problem solving, with a continuous focus on developing practical and impactful software products.

EDUCATION

Bennett University

B.Tech — Computer Science & Engineering | Expected Graduation: 2028 | **CGPA: 8.46 / 10**

Class XII: 77% | Class X: 90%

EXPERIENCE

BuildIt — Intern

- Contributed as an intern at BuildIt in a collaborative startup environment.
- Worked with team members on assigned tasks and gained practical exposure to professional software and startup workflows.
- Developed experience in communication, teamwork, execution, and working within a fast-paced environment.
- Collaborated with team members while contributing to ongoing organizational and project-related activities.

TECHNICAL SKILLS

Programming: C++, Python, JavaScript

Web Development: HTML, CSS, React, Responsive Web Design

AI & Application Development: Resume Parsing, Prompt Engineering, AI-Powered Application Development, LLM Application Development, REST API Integration, Agentic AI, AI Agents, Generative AI, AI Tools & Platforms

Tools & Platforms: Git, GitHub, VS Code, Vercel

Core: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

PROJECTS

Cover Letter Generator — AI-Powered Application

- Developed an AI-powered application designed to generate personalized cover letters.
- Used user-provided information to produce relevant and customized application content.
- Explored practical implementation of AI-assisted text generation and prompt engineering.
- Strengthened understanding of building user-facing applications around LLM capabilities.

Resume Parser — AI-Powered Resume Processing

- Developed an application capable of extracting structured information from resumes using AI-assisted workflows.
- Worked with resume data to identify and organize relevant candidate information.
- Gained practical experience in document processing, AI-assisted extraction, and structured data handling.

Portfolio Chatbot — AI-Powered Personal Portfolio Assistant

- Developed an AI-powered chatbot integrated with a personal portfolio to provide visitors with an interactive way to learn about projects, skills, experience, and background.
- Designed the chatbot experience around answering portfolio-related questions conversationally.
- Explored practical use of LLM applications for interactive and personalized web experiences.
- Strengthened understanding of prompt engineering and integrating AI functionality into web applications.

UniPaper BU — Academic Resource Platform

- Developed a platform designed to help Bennett University students access previous-year examination papers.
- Built the application around improving accessibility and organization of academic resources.
- Designed the platform with a student-focused user experience for easier discovery of relevant papers.

Kalavati Industries Website — Client Project

- Developed a professional business website for Kalavati Industries as a real-world client project.
- Focused on creating a modern, responsive, and visually engaging online presence for the business.
- Designed sections for products, business information, packaging, partnerships, benefits, and contact information.
- Gained practical experience in understanding client requirements and translating them into a production-oriented website.

LEADERSHIP EXPERIENCE

Minister of Operations — Student Cabinet

- Coordinated student initiatives and worked across teams to support the execution of student activities.
- Collaborated with multiple stakeholders to manage responsibilities and ensure smooth execution of initiatives.
- Developed leadership, communication, coordination, and operational management skills.

Junior Core Member — Management Team, FullStack Club BU

- Assisted in organizing club activities, technical events, and team initiatives.
- Worked closely with fellow core members to coordinate activities and contribute to club operations.
- Gained experience in teamwork, event coordination, communication, and organizational management.

HACKATHON EXPERIENCE

HackAccino 2026 — CSI Bennett University

- Participated in HackAccino 2026, the flagship hackathon organized by CSI Bennett University.
- Secured **55th position among 300+ participating teams**.
- Collaborated in a competitive, time-constrained environment to develop and present a technical solution.

AREAS OF INTEREST

Software Engineering • AI Engineering • Agentic AI • Generative AI • AI Agents • Full-Stack Development • Backend Development • Data Structures & Algorithms • LLM Applications • System Design

CURRENT LEARNING

Advanced Data Structures & Algorithms • Full-Stack Development • AI Engineering • LLM Applications • Prompt Engineering • System Design Fundamentals

SOFT SKILLS

Leadership • Teamwork • Communication • Problem Solving • Adaptability • Analytical Thinking • Time Management
